

CAD and PLM Training Solutions

CAD and PLM solutions have been chosen to meet your organization's unique business goals and objectives. Use Delivering Learning Solutions to support your investments in these tools. Training can be provided by many sources but most companies need more than just software training. They need to understand how to use and leverage the CAD and PLM solutions to be competitive. Delivering Learning Solutions goes beyond functional training to provide learning solutions. Instructor-led training is just one component to a successful learning solution.

Deliver Your Unique Message

IT'S NOT ABOUT TRAINING

Software vendors will provide canned instructor-led training by one of their instructors. Delivering Learning Solutions will provide you with custom learning solutions by one of our facilitators. One key differentiator between the two are the activities of the instructor and the facilitator. The instructor is a person who stands up in front of a class and performs the main role of disseminating content information— this person *will provide you with information*. A facilitator stands up in a training setting who's main role is to assist in helping others learn— this person will provide you with *an understanding of how to use the information*.

Knowing how to use your CAD and PLM solutions is *critical* to the success of your goals and objectives.

SOFTWARE SOLUTIONS FOR:

- Siemens NX software suite
 - NX4, NX5, NX6
 - NX CAM
 - NX CAE
- Teamcenter
 - Integration for NX
 - Integration for Inventor
 - Integration for SolidWorks

Competitive Advantages of Custom Learning Solutions:

- Learners focus only on the important skill competencies and only what they need to know.
- Your organization culture is integrated with the learning content.
- Each training component fits within your overall learning strategy.
- Leverage instructional design skills when your staff is too busy or does not have the appropriate skill set.

BLENDED TRAINING

More business are realizing that the best strategic learning solution is a blended learning solutions—a combination of Instructor-led and self-paced modalities. The advantage of a blended solutions is that it takes advantage of both modalities to create the proper blend of learning. Most organizations that adopt the blended strategy find that the process is more than they anticipated. We help organizations by designing, deliver, and supplement your training strategies to meet your organizational goals and objectives.

We deliver much more than training - we deliver learning *solutions*.
